STEP 1 — three copies of every word
The · cat · eats · fish
Q — what I am looking for
K — what I advertise
V — the content I deliver
STEP 2 — compatibility
one dot product per pair:
s(eats→cat) = 3.4
s(eats→fish) = 2.95
s(eats→The) = 1.0
STEP 3 — focus (softmax)
scores become
percentages:
The 5% · cat 55% · eats
5% · fish 35%
every row sums to 100%
STEP 4 — combine
new eats = 5%·V(The) +
55%·V(cat)
+ 5%·V(eats) + 35%·V(fish)
